ACT Access Control

Applications

Access Control
Regulate access to a premises and prevent entry to unauthorised individuals

Gate Automation
Automate entry and exit through a gate or barrier.

Door Monitoring
Receive an alert of any breach of security e.g. doors being forced or inadvertently left open.

Audio Door Entry
Manage access to your home or office by speaking to any visitors at the door via an intercom or a handset prior to granting or denying access.

Interlocking Doors
Increase security by only allowing the second door to be opened after the first has been closed e.g. in a cash office, clean room, etc.

Fire Alarm Interface
In the event of a fire all of the connected access points unlock automatically.

Duress Code (Panic Alert)
When used the door opens as normal but a silent alarm is activated.

About ACT

Access Control Technology (ACT) Ltd was formed in the mid nineties to design and manufacture high quality access control products for the security industry.

Our extensive range of access control and audio door entry products are to be found in both private domestic dwellings and busy commercial buildings.

Our international distribution network continues to expand serving installing companies in Europe, Asia, The Middle East and North America.

Our objectives are simply to provide excellence in design, manufacturing and customer service.

ACT 5prox Digital Keypad + Proximity

- *Pin & Proximity*
- 50 Users (Pin & Proximity)
- operating modes: pin, proximity or pin & proximity
- keypad backlighting
- potted electronics
- indoor / outdoor (IP67)
- surface / flush mount

ACT Access Control

Is the *Safety & Security* of *Staff & Property* a concern for your customers?

A building, its contents and the safety of staff are most vulnerable during opening hours. Strangers walking about freely, staff wandering into restricted areas and locks being replaced due to lost keys, are all problems.

Unsecured Property

Visitor Identification

Key Replacement

Health & Safety

How would Access Control help?

- cost effective security solution
- regulates access
- quick and easy installation
- minimal set up required
- multiple applications
- provides peace of mind
- no more replacing locks if keys are lost

ACT products
