Established in 1984, The Electro Automation Group is widely regarded as Ireland's leading automation company and has an enviable reputation for the design, supply, installation and maintenance of high quality automated systems. Following years of research, hands on experience and reacting to growing demand, Electro now offers the ultimate keyless access control system on the market.

Benefits

- ✓ RFID technology for contactless operation
- ✓ BLE-ready for smartphone operation via Mobile Keys
- ✓ Range of access tokens available (key cards, fobs and wristbands)
- ✓ Fully certified for fire safety and security
- ✓ Self-contained and low maintenance, no external wiring required
- ✓ Mechanical override key
- ✓ Market-leading 3-year return to base warranty

ELECTRO INFINITY

The Infinity is our best-selling contactless electronic lock, offering a reliable, smart key card lock that is hassle-free and ultra-secure. Electro Infinity electronic locks employ Radio Frequency (RFID) and Bluetooth (BLE) technology to offer simple, contactless operation. Its traditional yet contemporary design lends itself to new build schemes and refurbishment projects where locks may previously have been fitted.

A selection of lock cases, fore ends and keep plates enable easy upgrade from mechanical key locks or outdated magnetic card systems.

ELECTRO REVOLUTION

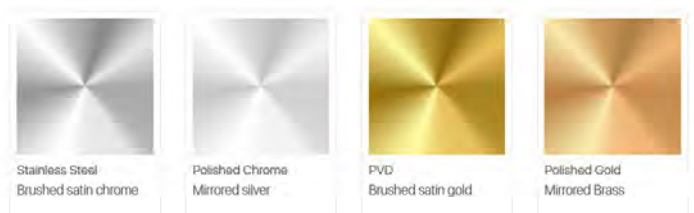

The Revolution is our slimline key card access door lock. Its modern, slimline design lends itself to refurbishment projects where you're not looking to conceal a previous lock fitting or when you are looking for a slim and modern keyless door lock.

Electronic locks in the Electro Revolution range employ Radio Frequency (RFID) and Bluetooth (BLE) technology to offer simple, contactless operation.

A selection of lock cases, fore ends and keep plates enable an easy upgrade from mechanical key locks or outdated magnetic card systems.

We offer a choice of 4 metal finishes

ELECTRO IDENTITY

When you're looking to make a statement with your electronic door locks, choose Identity. It features a highly individual 'split' design, with separate handle and key card reader, making it stand out from conventional contactless electronic locks for doors. The Electro Identity keyless lock for doors range is best suited to projects where concealment of previous lock fittings isn't a priority.

The Identity electronic lock employs Radio Frequency (RFID) and Bluetooth (BLE) technology to offer simple, contactless operation.

A selection of lock cases, fore ends and keep plates enables easy upgrade from mechanical key locks or outdated magnetic card systems.

ELECTRO REZLOK

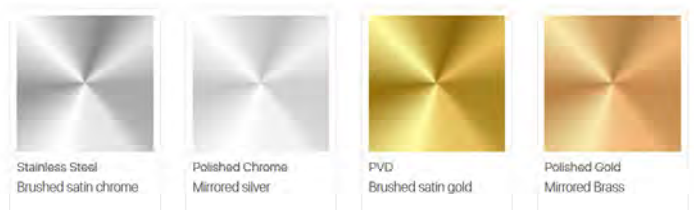

Occupying a special place in TLJ's electronic lock range, RezLok is a fully self-contained electronic handle set that is compatible with a variety of lock mechanisms, including multi-point locks.

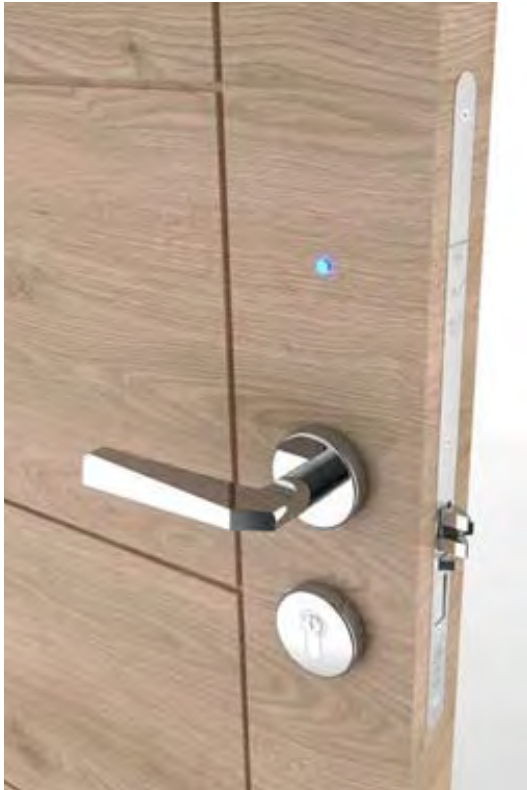

Ideal for both new and existing doors, and unusually for a keyless electronic lockset, RezLok suits most types of door construction, including UPVC and metal doors.

RezLok is configured for Radio Frequency (RFID) and Bluetooth (BLE) to offer simple, contactless operation by key card, fob or smartphone. It can also be integrated with many of our partners' smart building applications for full Smart Home Automation.

We offer a choice of 4 metal finishes

ELECTRO INVISIBLE

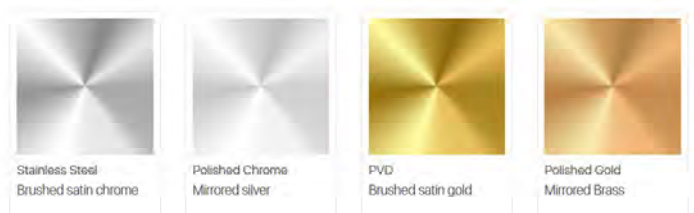

Offering the pinnacle in electronic access control solutions, Invisible by Electro is driven by design. All the essential parts of the Invisible lock mechanism are housed within the lock case itself. Only the lever, cylinder escutcheon and LED indicator are visible to the user, bringing you a more refined look.

Invisible, electronic contactless door lock is well suited to modern, higher specification building projects where beautiful aesthetic is paramount. A full length, matching face plate further enhances the look.

A specifier's dream – Invisible, is unlike most electronic lock sets in that it can be used with any lever or rose you like. This allows fittings to be matched throughout the building, with a consistent appearance for bedrooms, bathrooms, store rooms, apartments and entrance doors. The options are almost endless – finally, access control no longer restricts choice.

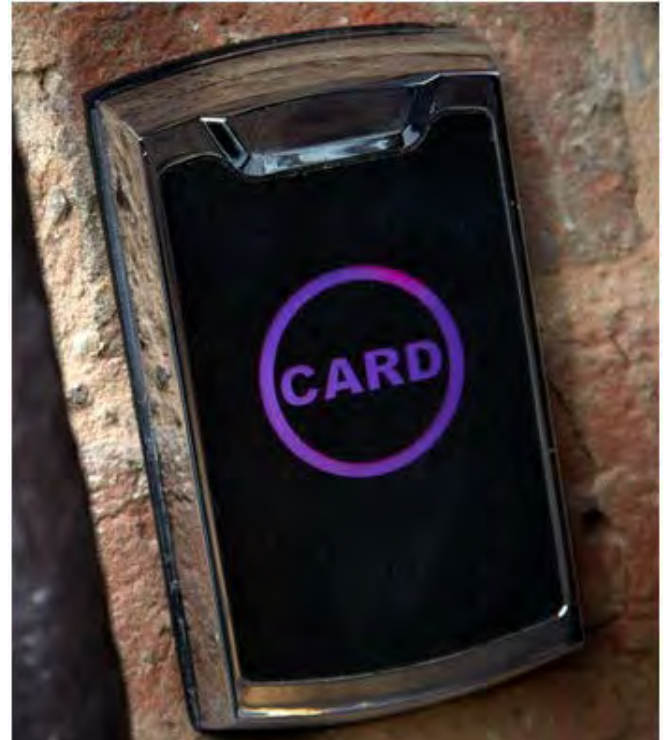

Invisible is configured for Radio Frequency (RFID) and Bluetooth (BLE) to offer simple, contactless operation by keycard, fob or smartphone. It can also be integrated with many of our partners' smart building applications for full Smart Home Automation.
